SpanMark

SpanMark Utility Line Marking systems improve line inspection techniques from helicopters and from the ground. Large durable lettering and numbering assemblies insure easy surveillance. Warning flags, blank or printed, are available at low cost.

Wide Variety

SpanMark flags, number systems and warning signs are available in a wide variety of characters to meet the needs of utilities. The rugged SnapFAST clamp is built for long, trouble free life, made of weather resistant ABS Makrolon plastic. The SnapFAST clamp gives a firm grip to the lines without slipping. The SpanMark unit can be easily installed and removed using the SpanMark tool.

SnapFAST Clamp

A patented SnapFAST stainless steel spring loaded clamp supports the signs and is easily mounted on the line with a unique tool, mounted on standard hot sticks. The signs and flags can be installed on hot lines.

Versatile

SpanMark systems can be mounted on lines up to 2 3/4" in diameter. Flags come in yellow, red or orange colors. 13 3/8" x 11 1/2". Signs come already inscribed or with frames for one, two, three or four numbers, field adjustable, slip in numbers. Numbers can be 1", 2", 3", 4", 5" or 6" high, vertical or horizontal. Frames and numbering systems are also available for poles and towers.
