**NEWS RELEASE-New Bird Diverter diverts birds from roosting,  
saving lives and preventing outages**

P & R Technologies new Bird-A-Way bird diverter spins and reflects in the wind bothering birds enough to divert them to other roosting locations. The Bird-A-Way bird diverter is made of stainless steel with ball bearings to allow ease of spinning. The rotating top measures 7" x 6" inches and has Diamond grade highly reflective material in fluorescent orange and yellow, plus silver dots to reflect and bother nearby birds. The Bird-A-Way device stands a total of 13" inches and mounts easily to wooden cross arms by the bolted bracket, or wood screw shaft, or flat plate for bolting to the surface. The Bird-A-Way bird diverter is rugged, built to last and is low cost (\$45.00) making it ideal for marking poles, towers and substation locations.

P & R Technologies is an industrial leading manufacturer of bird diverters, power line markers, obstruction lights, solar powered lights, warning flags and perimeter security systems. For more information visit [www.pr-tech.com](http://www.pr-tech.com) or call 800-722-8078(503-292-8682 outside the US.).
