January 15, 2010- for immediate release

NEWS RELEASE-PROTECT BIRDS FROM WINDOWS WITH NEW UV DECALS

P & R Technologies new WindowAlert UV decals warn birds of plate glass windows better than other decals because our decals reflect UV that birds more readily see. Birds have vision that is up to 12 times better than humans and are sensitive to UV light. The UV light is invisible to humans, but glows like a stoplight for birds. Our decals are clear to humans, so our view is not obstructed. WindowAlert decals are static cling decals, come in packets of 4- square or mapleleaf design for \$7.50 per packet.

P & R Technologies Inc. of Portland, Oregon offers an industry leading selection of bird diverters, power line markers, solar powered obstruction lights, LED obstruction lights, and warning flags. For more information, visit www.pr-tech.com or call 800-722-8078 (503-292-8682 outside US.).
