

NEW PRODUCT NEWS RELEASE

P & R Technologies introduces the world's best bird diverter and pond hazing device.

The new FireFly Pond Diverter. This product features:

- Environmental Protection and Compliance to prevent wildlife contamination in oil treater pits and ponds. Reducing costly netting of the facility.
- Health & Safety– Prevention of Equipment eliminates contamination by bird droppings, which is a vector for human diseases.
- Pollution control device for Emergency Response for oil spills by reducing contamination of migratory birds in compliance with State and Federal regulations.
- Oil treater ponds and pits wildlife hazing device to deter migratory birds from landing.
- Product is chemical resistant, uv-inhibited for outdoor weather, and can withstand harsh environments. Can be installed easily to float on water and treatment ponds, and can be anchored in place to prevent drifting in wind and rain.

A proven diverter, world's best diverter / flapper and hazing device. Prevents bird nesting and roosting under eaves, and in unwanted areas. Product spins in the wind reflecting sunlight and glowing after dusk to keep birds away and off of water, buildings, etc. Deters birds from landing on produced water ponds, oil spills, and process water pits.

The new FireFly Pond Diverter, developed by a biologist, offers homeowners, municipalities, government offices, building owners a proven bird diverter that will prevent birds from roosting, building nests under eaves, or being in unwanted locations. The FireFly sways and spins in the wind reflecting the sunlight and glowing after dusk to keep birds away and off buildings, etc. Visit our web site at www.pr-tech.com, or call 503-292-8682, fax 503-292-8697 for more information.
