

## QuikMARK

### LINE MARKING SYSTEM

#### EASY INSTALLATION

QuikMARK markers can be mounted on all hot lines up to 2 ½" in diameter. A patented SnapFAST clamp, weather resistant, and, with a stainless steel spring, securely grips single or bundled lines. Simply push the unit up against the line with a SpanTOOL mounted on the end of a hot stick and the clamp snaps shut. To quickly remove, use the same tool and pull the QuikMARK off of the line, very simple.

- Universal Power Line Marker
- Easy Installation on Hot Line
- Low Cost
- Firm Grip on Lines
- Easy Removal from Hot Line with SpanTOOL
- Available in 10" dia. Disc
- Light Weight
- Great for construction sites, marinas and distribution lines.

P & R Technologies is pleased to introduce our new Model QM-D-10 QuikMARK distribution power line marker. Our new QuikMARK 10" orange disc attaches to all distribution lines 115KV or less by our patented SnapFAST spring loaded clamp. Installation can be accomplished "HOT" from the ground by hot stick and takes only seconds to complete.

The Model QM-D-10 QuikMARK power line marker eliminates costly outage and installation costs while also offering a universal fit clamp system that permanently attaches the QuikMARK to the line at a low cost. QuikMARK markers can be installed on all low lines, marinas, construction zones, or higher lines for heliports, river crossings and high traffic areas.

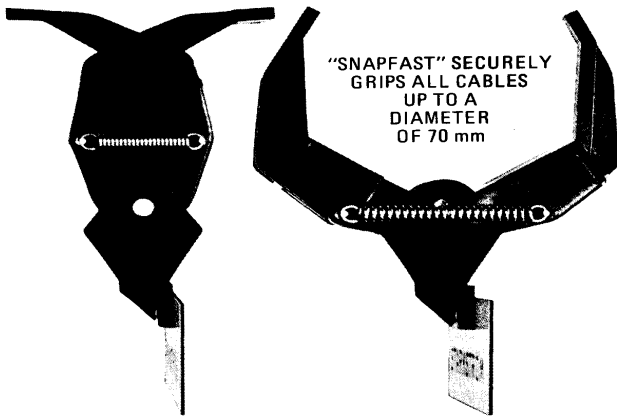

## Long Life

QuikMARK Markers are designed for long life. The markers itself is made of jet age plastic, strong and lightweight. The clamp is weatherproof and provides a firm, permanent grip to the line.

## Versatile

QuikMARK are the ideal units for temporary construction sites, marinas, industrial plants, etc., where high machinery can strike power lines. QuikMARK can be an easy, low cost, quick solution to marking distribution power lines or make bird flyways safe for migrating fowl. The markers can be installed with a hot stick without interrupting power.

### SnapFAST CLAMP

Made from weather-resistant ABS-Makrolon with a stainless-steel spring action, "SnapFAST" Clamps securely grip all single or bundled cables up to a diameter of 70 mm. Using the special "SpanTOOL" installation tool fitted to a suitable insulating pole these signs can be installed and removed FROM THE GROUND without cutting the power.
