Hammarprodukter Aerial Survey Signs

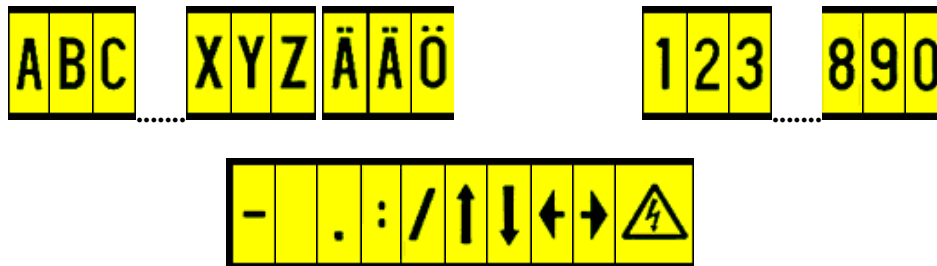

Aviation Number Sign Type 1 H 160
 Printed on one side. Text height 160 mm.

For lattice towers and steel cross bars.

A new type of the one side printed Aviation Number Sign enabling easy assembly of signs with up to 10 characters. The new system consists of a made to order base plate and single characters. The base plate is made from 2,5 mm extruded aluminum profiles, coated with varnish and painted in black weather-proof paint.

Complete with punched out holes and compression moldings for easy fixing using e.g. bolts and clips. The characters are screen printed in black on 1 mm yellow painted sheet aluminum.

Complete signs are made to order.

The characters are screen printed in black on yellow sheet aluminium and coated with varnish after printing.
