SolarPower

ASE Photovoltaic Modules

ASE Americas makes the highest power output modules available today. The 300 watt modules are available in 12 volts for 12 volt systems and in 51 volts peak power output for utility intertie systems. These modules can match power output of conventional panels with far fewer modules, reducing wiring by as much as 80%, lowering overall system cost and increasing system reliability.

Connecting large-area 300 watt modules is safe, fast and mistake-proof with A S E 's quick connect cables. Each solar cell is inspected and power matched. Modules have conduit-ready junction boxes with bypass diodes and advanced Steadfast™ encapsulant (not EVA) .

These large-area modules are shipped by truck in crates of 20. For orders of quantities less than 20, there is a significant crating charge. 20 year warranty. UL Listed and Class Afire rating.

	Wattage Peak (watts)	Warranty (years)	Weight (LB)
ASE 285-DG 17V	285.	20	107
ASE 285-DG 50V	285.	20	107
ASE 50-ATF 17V	50.	10	14
