## SolarPower

### Solar Battery Chargers

**Solar Battery Maintainer** - Maintain the charge on your car battery with this 1.5 watt, high quality module. Set it on the dashboard when your car will not be used for an extended period of time, and plug it into the cigarette lighter. This single crystal module is more efficient and durable than most other car chargers, which commonly use thin film technology. Output is 100 mA in full sun. Can be used outdoors. Made in China. 1-year warranty.

	Length (IN)	Width (IN)	Height (IN)	Weight (LB)
<b>Solar Battery Maintainer</b>	9	0	5	1

**Encapsulated Modules** - These modules are made with the same process as the framed modules above, but they do not have frames. They can be built into other products or used where a light-weight module is needed. The .4 watt modules have 2" solder tabs on the back for connection. The 5 watt modules have a 10 foot cable, while the others have a 12" cable. Size and wattage may change with cell supply. Assembled in Mexico. 1-year warranty.

	Wattage Peak (watts)	Warranty (years)	Weight (LBS)
<b>PV-5/6V-E</b>	5.	1	2

**Lightweight Laminated Modules** - We make these modules for powering fans, pumps and for trickle charging batteries. They are made by laminating 36 solar cells between layers of EVA plastic with a Tedlar cover and a fiberglass back. They have a six foot cable attached to the front of the module on one end. Made in China. 2-year warranty.

	Wattage Peak (watts)	Warranty (years)	Weight (LBS)
<b>PV-20/12V-L</b>	20.	2	3
